

Digital Technology and Culture 338

Washington State University, spring 2008

Introducing yourself via a podcast

1. Write a quick script. In it include the following:
 - * Your name
 - * Background about you and your interest in your topic
 - * What you hope viewers will learn from your blog; and/or ground you will cover
 - * What you hope viewers will add (the interactivity plug)
2. Record your script, using either Audacity, Gabcast or your program of choice; do a couple of takes, one just by memory of the script and one by reading the script, to hear which one you like best.
3. Post your podcast, using Switchpod, Gabcast or your own server.
